SUMMARY

Final-year CS student at UiTM Shah Alam, specialising in DevSecOps. I build security-gated CI/CD pipelines integrating SAST, DAST, and container scanning, and run a self-hosted Debian server with 8+ Dockerised services behind a hardened Nginx stack and Cloudflare Tunnel. My work sits where software development meets infrastructure security. Available for a 14-week internship from 7th September to 11th December 2026. Feel free to reach out.

SKILLS

Infrastructure & DevOps: Docker, Linux, CI/CD (GitHub Actions), Self-hosted Infrastructure, Network Security (UFW, Fail2ban, CrowdSec, Tailscale), Nginx, Cloudflare, Git / GitHub

Security & DevSecOps: Nmap, SAST (Semgrep), DAST (OWASP ZAP), Trivy (SCA/Image/IaC), Gitleaks, Hadolint, SBOM (CycloneDX), Dependabot

Frameworks & Tools: Express.js / Node.js, FastAPI, React, PostgreSQL, MongoDB, Flutter, Android, Firebase, REST API Design, JWT Authentication, MERN Stack

Languages: JavaScript, Python, Java, Kotlin, Dart, SQL, Bash, HTML / CSS

EXPERIENCE

Examination Area Coordinator

Community Tuition Group, Selangor

May 2025

- Supervised an exam hall of 20+ students independently, managed seating, distributed materials, and maintained order throughout

Part-time Crew Member

Subway, Eco Grandeur, Puncak Alam

April 2021 – July 2021

- Handled high-volume peak operations from open to close, coordinating with the team to keep service running.

PROJECTS

Debian Homeserver (Maintained)

Technologies: Debian Linux, Docker, Nginx, UFW, Fail2ban, CrowdSec, Tailscale, Cloudflare, Vaultwarden, Bash

- Self-hosted Debian server running 8+ Dockerised services behind a hardened Nginx reverse proxy and layered network security, with private VPN access and a Cloudflare Tunnel exposing zero inbound ports.
- GitHub: <https://github.com/syamxm>

TaskFlow (Maintained)

Technologies: MongoDB, Express, React, Node.js, Docker, Nginx, GitHub Actions, Semgrep, Trivy, Gitleaks, Hadolint, OWASP ZAP, JWT, AES-256-GCM

- MERN task manager with a security-gated CI/CD pipeline: 7 automated scanners gate deploy on HIGH or CRITICAL findings, plus an advisory OWASP ZAP DAST baseline. Hardened non-root containers, per-route rate limiting, and JWT auth.
- GitHub: <https://github.com/syamxm/taskflow>
- Live demo: <https://taskflow.syamxm.com>

Portfolio Website (Maintained)

Technologies: Node.js, Express, PostgreSQL, Docker, GitHub Actions, Tailscale, Cloudflare, CI/CD

- Data-driven CV and one-page resume served from a single REST API, auto-deployed by a GitHub Actions pipeline to a self-hosted server and published through a Cloudflare Tunnel.
- GitHub: <https://github.com/syamxm/cv-api>
- Live demo: <https://cv.syamxm.com>

Final Year Project - C-Aegis (In Development)

Technologies: Kotlin, XML, Firebase, Google Maps API, Radar API

- Android parental monitoring app (Final Year Project): parent/child dashboard, real-time geofence alerts, and tamper-resistant app-usage enforcement.
- Private repository

Student Reminder System (Maintained)

Technologies: Flutter, Dart, Python, FastAPI, Redis, Docker

- Flutter timetable and push-notification app for UiTM students, backed by a Dockerised FastAPI service.
- GitHub: https://github.com/syamxm/student_reminder_system

EDUCATION

Universiti Teknologi MARA (UiTM)

Bachelor of Computer Science (Honours), Shah Alam, Selangor, CGPA 3.66

October 2023 – Expected March 2027

- Dean's List every semester
- Final Year Project: C-Aegis, Android parental monitoring app

Universiti Teknologi MARA (UiTM)

Foundation in Engineering, Dengkil, Selangor, CGPA 3.81

August 2021 – July 2022

- Top 10% of faculty cohort
- Ranked 1st in cohort during 2nd semester

SMK Saujana Utama

SPM (Malaysian Certificate of Education), Saujana Utama, Selangor

2020

- Achieved 8A out of 9 subjects

LANGUAGES

- English (Fluent)
- Malay (Native)
