SUMMARY

Final-year CS student at UiTM Shah Alam, specialising in DevOps. I build automated CI/CD pipelines and containerised deployments, and run a self-hosted Debian server with 8+ Dockerised services behind a hardened Nginx stack and Cloudflare Tunnel, monitored with Prometheus and Grafana. Strong security foundation: my pipelines integrate SAST and container scanning. Available for a 14-week internship from 7th September to 11th December 2026, extendable up to 6 months if required.

PROJECTS

Debian Homeserver (Maintained)

Technologies: Debian Linux, Docker, Nginx, UFW, Fail2ban, CrowdSec, Tailscale, Cloudflare, Vaultwarden, Bash

- Self-hosted Debian server running 8+ Dockerised services behind a hardened Nginx reverse proxy and layered network security, with private VPN access and a Cloudflare Tunnel exposing zero inbound ports.
- GitHub: <https://github.com/syamxm>

TaskFlow (Maintained)

Technologies: MongoDB, Express, React, Node.js, Docker, Nginx, GitHub Actions, Semgrep, Trivy, Gitleaks, JWT

- MERN task manager with a security-gated CI/CD pipeline: five scanners (Semgrep SAST, Gitleaks secrets, and Trivy across SCA, image, and IaC) block deploy on HIGH or CRITICAL findings.
- GitHub: <https://github.com/syamxm/taskflow>
- Live demo: <https://taskflow.syamxm.com>

Portfolio Website (Maintained)

Technologies: Node.js, Express, PostgreSQL, Docker, GitHub Actions, Tailscale, Cloudflare, CI/CD

- Data-driven CV and one-page resume served from a single REST API, auto-deployed by a GitHub Actions pipeline to a self-hosted server and published through a Cloudflare Tunnel.
- GitHub: <https://github.com/syamxm/cv-api>
- Live demo: <https://cv.syamxm.com>

Student Reminder System (Maintained)

Technologies: Flutter, Dart, Python, FastAPI, Redis, Docker

- Flutter timetable and push-notification app for UiTM students, backed by a Dockerised FastAPI service.
- GitHub: https://github.com/syamxm/student_reminder_system

BeanThere (Maintained)

Technologies: PHP, MariaDB, TailwindCSS, Docker

- Coffee shop web app: online ordering, loyalty rewards, AI drink recommender, and a full CI/CD pipeline with security scanning on a self-hosted server.
- GitHub: <https://github.com/syamxm/BeanThere>
- Live demo: <https://beanthere.syamxm.com>

EXPERIENCE

Examination Area Coordinator

Community Tuition Group, Selangor

May 2025

- Supervised an exam hall of 20+ students independently, managed seating, distributed materials, and maintained order throughout

Part-time Crew Member

Subway, Eco Grandeur, Puncak Alam

April 2022 – July 2022

- Handled high-volume peak operations from open to close, coordinating with the team to keep service running.

EDUCATION

Universiti Teknologi MARA (UiTM)

Bachelor of Computer Science (Honours), Shah Alam, Selangor, CGPA 3.66

October 2023 – Expected March 2027

- Dean's List every semester
- Final Year Project: C-Aegis, Android parental monitoring app

Universiti Teknologi MARA (UiTM)

Foundation in Engineering, Dengkil, Selangor, CGPA 3.81

August 2022 – June 2023

- Top 10% of faculty cohort
- Ranked 1st in cohort during 2nd semester

SMK Saujana Utama

SPM (Malaysian Certificate of Education), Saujana Utama, Selangor

2022

- Achieved 8A out of 9 subjects

SKILLS

Infrastructure & DevOps: Docker, Linux, CI/CD (GitHub Actions), Self-hosted Infrastructure, Network Security (UFW, Fail2ban, CrowdSec, Tailscale), Nginx, Cloudflare, Git / GitHub, Observability (Prometheus, Grafana, Loki)

Security: Nmap, SAST (Semgrep), Trivy (SCA/Image/IaC), Gitleaks

Frameworks & Tools: Express.js / Node.js, FastAPI, React, PostgreSQL, MongoDB, Flutter, Android, Firebase, REST API Design, JWT Authentication, MERN Stack

Languages: JavaScript, Python, Java, Kotlin, Dart, SQL, Bash, HTML / CSS

LANGUAGES

- English (Fluent)
- Malay (Native)
